PRESIDENCY**

27-29 May 2015
Leipzig, Germany

2015
annual summit

A look back at the 2015 Summit

Trade and tourism are two unparalleled global success stories. They are creating the wealth of nations and created ties that bind people around the globe. The key enabler of that phenomenal success is, and will continue to be, transport. All great leaps forward in trade and tourism have been associated with innovation in transport - from the advent of steam-driven trains and ships via the car and passenger air travel to the automated and networked mobility that we see on the horizon.

Transport faces enormous challenges in that role today: challenges in responding to growing and shifting trade flows. Challenges in preparing for shocks to supply chains as natural disasters become more frequent and serious. Challenges, not least, in balancing mobility with sustainability as the number of travellers increases and global trade expands further still.

The interrelationships between the "three Ts", Transport, Trade and Tourism, and how they can be made more productive are of concern to leaders who shape policy and drive business everywhere. Almost 1100 of them, from 66 nations and including 35 ministers and vice ministers, came to Leipzig in Germany in the last week of May to explore the future of transport trade and tourism at the 2015 Summit of the International Transport Forum under the Presidency of New Zealand and its Minister of Transport, the Hon. Simon Bridges.

The upcoming global climate talks at the 21st Conference of Parties (COP 21) in Paris in December 2015 provided a topical prism for this discussion. More than four decades after the first oil shock, transport still accounts for about a quarter of global CO₂ emissions. Sustainable growth of trade or tourism - of the economy in general - will not be possible without de-carbonising transport. UN Secretary-General Ban Ki-moon, in his video message to the Summit, thus urged ministers to accelerate efforts to reshape the world's transport systems. The launch in Leipzig of the "Paris Process of Mobility and Climate" by 150 transport stakeholder organisations aiming to accelerate the implementation of climate commitments in transport, underlined that the sector is ready to act now.

The pertinence of issues and the continued high level of participation underline the role of ITF's Annual Summit as the premier transport policy event in the world. Ministers value "the Davos of Transport", as Leipzig has been called, for the richness and depth of exchange across regions, cultures, economic development levels and political affiliations. More than 100 bilateral and multilateral meetings were held during the Summit and the increasingly popular Ministers' Roundtables (which allow ministers to discuss hot topics - regulating drones, liberalising rail transport, aviation security - without entourage) are testament to the Summit's increasing role in helping to compare, vet and shape policy.

Among the many outcomes of the Summit - from the Declaration from Ministers on Transport, Trade and Tourism agreed by the Council of Ministers of Transport to the three international agreements signed in Leipzig - perhaps the most seminal was the accession of three new countries to the ITF. With Argentina, Israel and Morocco, the organisation now counts 57 member countries.

Their accession to the ITF and the success of the 2015 Summit are testimony to the value that the work done by our small and truly lean organisation is bringing to its member governments. And the fact that Korea's largest airport, Incheon International, joined the ITF's Corporate Partnership Board (CPB) in Leipzig in the presence of Korea's Minister of Land, Infrastructure and Transport, Yoo Il-ho (following the example of recent CPB members as Google and Ford) demonstrates the interest that ITF has been able to generate in policy debate in the private sector.

This brochure assembles highlights of the 2015 Summit, for nostalgic perusal by those who were lucky enough to be in Leipzig, and to provide a glimpse of the Summit spirit for those who are considering attending next time. On 18-20 May 2016, the Summit will reconvene in Leipzig under the Presidency of Denmark, for three days of networking and debate around the topic "Green and Inclusive Transport". Meanwhile, all 2015 Summit materials - session summaries, presentations, video recording and photos - are available on the Summit website at www.internationaltransportforum.org/2015.

My colleagues and I are looking forward to seeing you next year. Until then, do write to me at itf.contact@oecd.org with your questions or suggestions.

Yours sincerely,

José Viegas
Secretary-General

About the International Transport Forum

Who we are

The International Transport Forum at the OECD is an intergovernmental organisation with 57 member countries. It acts as a think tank for transport policy and organises the Annual Summit of transport ministers. ITF is the only global body that covers all transport modes.

What we do

ITF works for transport policies that improve peoples' lives. Our mission is to foster a deeper understanding of the role of transport in economic growth, environmental sustainability and social inclusion, and to raise the public profile of transport policy.

How we do it

ITF organises global dialogue for better transport. We act as a platform for discussion and pre-negotiation of policy issues across all transport modes. We analyse trends, share knowledge and promote exchange among transport decision-makers and civil society. ITF's Annual Summit is the world's largest gathering of transport ministers and the leading global platform for dialogue on transport policy.

Where we come from

The International Transport Forum was created on 18 May 2006 by ministers from 43 countries. The roots of ITF go back to 1953, when 16 European nations established the European Conference of Ministers of Transport (ECMT), an international organisation by treaty, to "co-ordinate and rationalise European inland transport of international importance".

Our achievements

ECMT and ITF resolutions, recommendations and reports have informed transport policy decisions on issues as diverse as railroad regulation and road safety, accessibility and environmental standards, or market liberalisation for international road haulage services. Seat belts, helmets for motorcyclists, speed limits, blood alcohol limits and targeted traffic education programmes were all pioneered by ECMT before becoming the norm.

Our structure

The International Transport Forum is designed to be a flexible, efficient and politically responsible institution that creates value for its members. The Forum is administratively integrated into the Organisation for Economic Co-operation and Development (OECD), but it is politically independent, and many of its member countries are not OECD members.

Summit topics

Session summaries, presentations, video recordings and photos for download at www.internationaltransportforum.org/2015

Alexander Dobrindt,
Federal Minister of Transport
and Digital Infrastructure,
Germany

“The world is facing
the next revolution
in mobility”

“We want to set
an example in the
fight against global
warming”

Alain Vidalies,
Secretary of State
for Transport, Sea
and Fisheries, France

David Plouffe,
Uber

“The taxi industry has
had a monopoly, and
they want to keep it
that way. Those days
are going to be over”

Ban Ki-moon,
UN Secretary-General

“It is time to reshape the
world’s transport systems
for a cleaner, safer and more
sustainable future”

“Trade liberalisation
will bring invest-
ment to develop-
ing countries suffering
from poor transport
infrastructure”

Xiaozhun Yi,
Deputy Director General,
World Trade Organization

Warren Truss,
Deputy Prime Minister,
Australia

“The next generation will
be driving predominantly
electric cars that will in
many cases be driverless.
In planning, we need to
take account of the fact”

“The way for developing nations
to lift their population out of
poverty is by linking up to global
value chains. For that, your
transport system has to work”

Lisa Raitt,
Minister of Transport,
Canada

“We require a workforce with
the right skills to support and
operate our transportation
systems. Gender should not
be a barrier”

Joakim Reiter,
Deputy Secretary-General
UNCTAD

Violeta Bulc,
European Commissioner
for Transport

“The core vision is the
creation of a single
European transport
area”

“Shared, networked assets always provide more value than proprietary assets”

Robin Chase,
Founder, Zipcar,
Veniam

Andrés Gómez-Lobo,
Minister of Transport and
Telecommunications,
Chile

“Resilience is all about preparation”

“Can regulation be improved? Yes. But until rules are changed, they must be respected”

Umberto de Pretto,
Secretary-General,
International Road
Transport Union

“An ambitious and effective agreement is the first line of defence against climate change. This is why COP 21 is important”

Simon Bridges,
Minister of Transport,
New Zealand

Lutz Bertling
President and COO,
Bombardier
Transportation

“We need to go for international standards and international regulation for automated vehicles”

Chong Meng Tan
Group CEO
PSA International

“With mega-ships, the shipping industry will have to address the other elements of the trade chain”

“We must put a big, fat price on emissions to modify conduct”

Angel Gurría,
OECD Secretary-General

Georg Kapsch,
CEO of Kapsch
TrafficCom

“Business-driven innovation will foster environmentally-friendly transport”

Summit quotes

Session summaries, presentations, video recordings and photos for download at www.internationaltransportforum.org/2015

The 2015 Summit at work:

Transport Achievement Award

GoSwift: Smart border crossing management

José Viegas presents the 2015 Transport Achievement Award to GoSwift CEO Hannes Plinte (right). GoSwift runs an innovative queue management service at the Estonian border crossing points, which allows vehicles to pre-book time slots. This has cut waiting times at the border from 5 to 6 days during peak season to minutes.

www.goswift.eu

Special Mention: Transdanube

The Danube region is one of Europe's most promising tourist destinations. Fourteen partners from eight countries in the Transdanube network promote sustainable transport and tourism along the river.

<http://transdanube.eu/>

Promising Innovation in Transport Award (Passenger)

UbiGo: An integrated mobility service for everyday travel

Hans Arby, CEO of UbiGo, receives ITF's 2015 Promising Transport Innovation Award in the passenger category from Swedish Minister of Infrastructure Anna Johansson. UbiGo works like a flexible mobile phone subscription, but with units for use of mobility services, rather than the number of SMS sent or Gigabytes surfed. The service combines public transport, car-sharing, rental car service, taxi and a bicycle system in a smartphone app.

www.ubigo.me

Special Mention: One Card All Pass (Korea)

The One Card All Pass is a nationally compatible transport card that covers bus, metro, railway and expressway travel across the country and replaces 11 different regional operators' cards.

Promising Innovation in Transport Award (Freight)

St. Lawrence Seaway: Hands-free mooring in deep-water locks

Manually securing cargo ships in locks with steel mooring lines is time consuming, labour intensive and potentially dangerous. The St. Lawrence Seaway Management Corporation (SLSMC) in concert with its supplier, Cavotec, developed the first ever hands-free mooring solution for locks. Terence Bowles, President and CEO of SLSMC received the 2015 Promising Transport Innovation Award in the freight category in the presence of Canada's Deputy Minister of Transport, Infrastructure and Communities, Louis Lévesque (right).

www.greatlakes-seaway.com/en

Special Mention: Siemens eHighway (Germany)

The eHighway brings the benefits of electric mobility to heavy-duty road freight. It combines overhead contact line electrification with hybrid-electric trucks that can also drive outside of the electric road.

www.siemens.com/mobility/eHighway

Shaping the future of transport

ITF Young Researcher of the Year

Dr. Nihan Akyelken, University of Oxford

Germany's Parliamentary State Secretary Dorothee Bär (left) and Turkey's Deputy Minister of Transport, Yahya Baş (right), on stage with Dr. Nihan (Turkey), ITF's 2015 Young Researcher of the Year, during the Gala Dinner awards ceremony.

An international jury of experts chose Dr. Akyelken for her contribution to developing a conceptual framework for the governance of sustainable freight transport in the age of globalisation. "It is no longer possible to distinguish between logistics and manufacturing systems," writes Akyelken in her winning paper.
