

2nd ITF Statistical Meeting 1-2 April 2015- PARIS

6.3 – International benchmarking data

Countries requested at our last meeting

- Improve data dissemination
- Cooperate with Eurostat to reduce burden
- Plans to collect data on maritime and air
- Develop more indicators for international benchmarking

Suggested themes for benchmark indicators

Transport Infrastructure

Network and spending

Transport Equipment

Rail, road, inland waterways

Transport Measurement

Goods and passenger

Traffic

Rail and road

Road Safety

Risk exposure

Economic and Social

Household spending

Taxes and charges

Energy and Environment

Transport emissions

Suggested indicators

Transport Infrastructure

- Road and rail network density (km/m², km/pop ...)
- High Speed network % of rail network
- Investment as % of GDP
- Investment/maintenance ratio

Transport Equipment

- Fuel type vehicles/total vehicles
- Share of diesel vehicles (rail and road)

Transport Measurement

- T-km / GDP
 - P-km / GDP
- 

Suggested indicators (continued)

Traffic

- Rail goods versus pass V-km
- Road vehicles type V-Km/total road V-km

Road Safety

- killed per population and killed per V-km
- Accidents per killed and per injured

Economic and Social

Household spending transport/ total spending

Energy and Environment

Transport emissions per population

**Views, proposals and suggestion
are welcome**

Thank you
