

COVID-19 Related Transportation Data in the United States

Steven Beningo

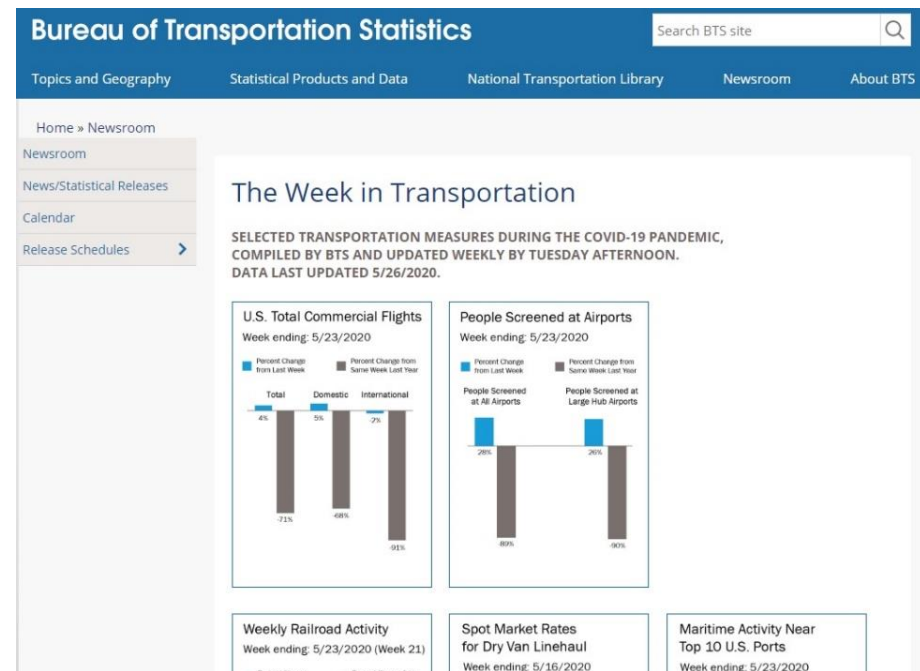

June 4, 2020

New Paradigm

- In the words of Bureau of Transportation Statistics (BTS) Director Pat Hu: “Let’s send out a flash indicator right now — we can refine that later on.”
- BTS staff found and acquired real time and near real time transportation data from public and private sources.
- Differs from traditional statistical products because timeliness is more of a focus than statistical quality. BTS continues to maintain traditional statistical products that require a highly deliberative process.

The Week in Transportation

- BTS quickly developed *The Week in Transportation* dashboard using new and innovative methods with the latest data from our partners to provide the public with an understanding of how the transportation system is operating in response to COVID-19.

The Week in Transportation

- Found at:
<https://www.bts.gov/newsroom/week-transportation>
- Indicators:
 - U.S. Commercial Flights
 - People Screened at Airports
 - Weekly Railroad Activity
 - Spot Market Rates for Dry Van Linehaul
 - Freight Vessel Activity Near Top 10 U.S. Ports
 - Border Crossing Data
 - Subway Ridership in New York City, Washington D.C., and the San Francisco Bay Area
- BTS also has developed an internal indicator card that includes data on additional indicators for Department of Transportation Leadership.

Thank you for your attention
