The Danish Government has implemented border control at all of Denmark’s borders as part of the effort to curb the spread of COVID-19/coronavirus.

The transport of goods by road is not restricted by the boarder control (e.g. picking up or setting down goods in Denmark as well as transit is allowed. The transit must be completed without undue delay).

The Danish authorities have established fast track lanes for trucks.

Denmark has decided to automatically prolong the validity of drivers’ certificate of professional competences and drivers’ driving licences to 31th of August 2020, that otherwise are due to expire in the forthcoming period.

Denmark has suspended a national restriction relating to drivers. In the current legislation, only drivers employed at a transport company can operate that company’s vehicles.
