Prioritising walking to create a safe and accessible City

Bruce McVean
Strategic Transportation Group Manager
90% of on-street journeys that start or finish in the City are entirely or partially walked, including walking to and from public transport.
84% of people think pavements are overcrowded

60% of people think that people walking are given too small a share of street space

65% of people think the needs of people walking are underprioritised
Potentially 125,000 additional people walking on our streets each day in next 25 years an increase of nearly 30%
Our vision:
Streets that inspire and delight, world-class connections and a Square Mile that is accessible to all.
