
**RESOLUTION No. 91/7 ON REMOTE AUTOMATIC DEBITING
SYSTEMS FOR THE COLLECTION OF ROAD TOLLS**

[CEMT/CM(91)21/REV1]

The Council of Ministers of Transport of ECMT, meeting in Paris on 21st November 1991,

HAVING REGARD to the questionnaire on toll collection systems which was sent to Member countries in 1989;

CONSIDERING:

- The progress made in the context of the Community's R&D programmes which seek to establish practical specifications for a European system for the remote automatic debiting of tolls;
- The work recently undertaken by the CEN Technical Committee TC 278 with a view to the standardisation of these systems;

SEEKING to ensure that such a system is introduced on the basis of technical specifications that are compatible among all Member countries and that the methods of allocating revenues are harmonised;

RECOMMENDS that:

- The European bodies concerned with standardisation expedite the work on the standardisation of systems for the remote automatic debiting of tolls;
- The national authorities concerned become involved in the work of those bodies;

INSTRUCTS the Committee of Deputies to monitor the implementation of this Resolution and report back to it in due course;

REQUESTS that the text of this Resolution be sent to the European bodies concerned with standardisation and to the operators of road infrastructure.
