TRANSPORT STATISTICS

UNECE

# UNECE Transport Statistics Activities

Alex Blackburn, UNECE

Presentation to ITF Statistics Meeting 21-22 October 2021

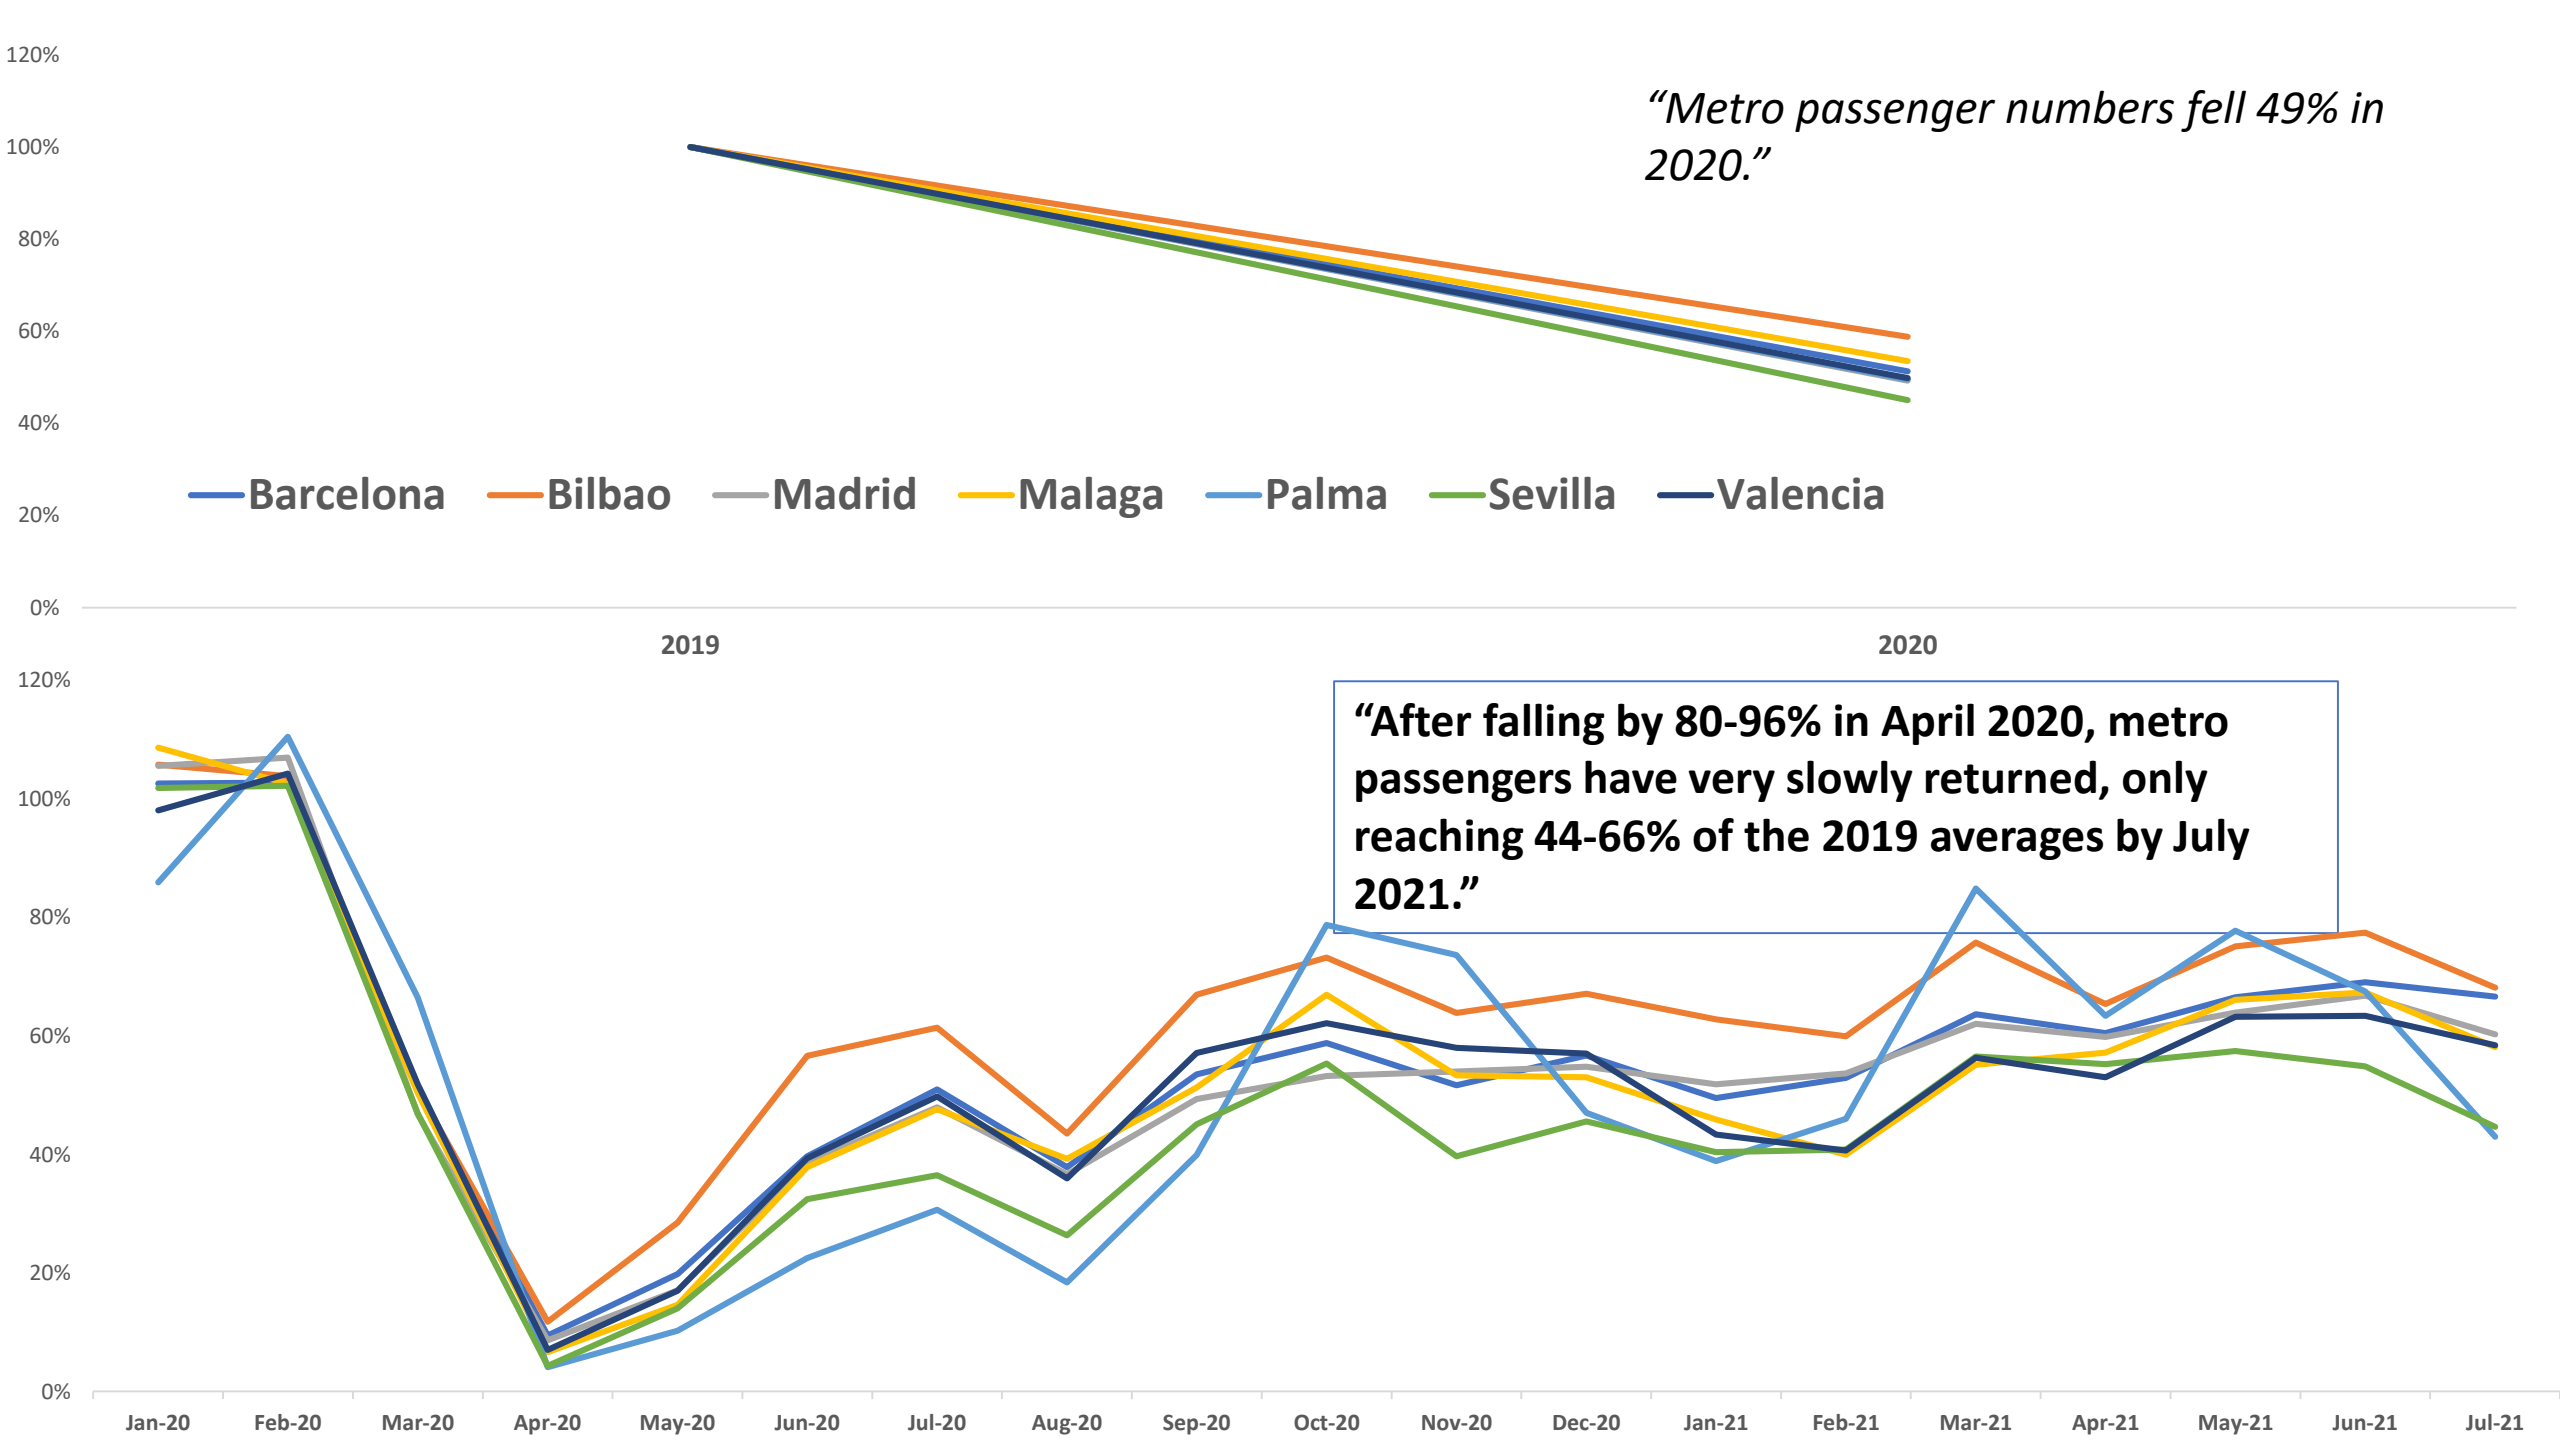

- Public transport statistics
- Timeliness
- MNO Data/Big Data: What next?
- Censuses
- Dissemination

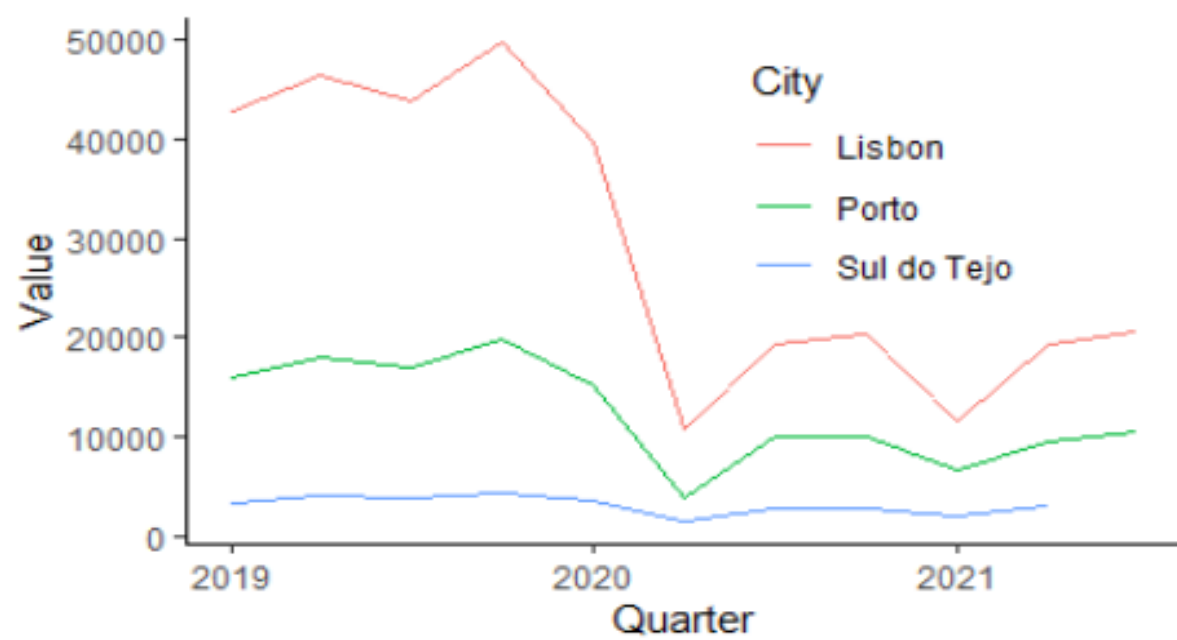

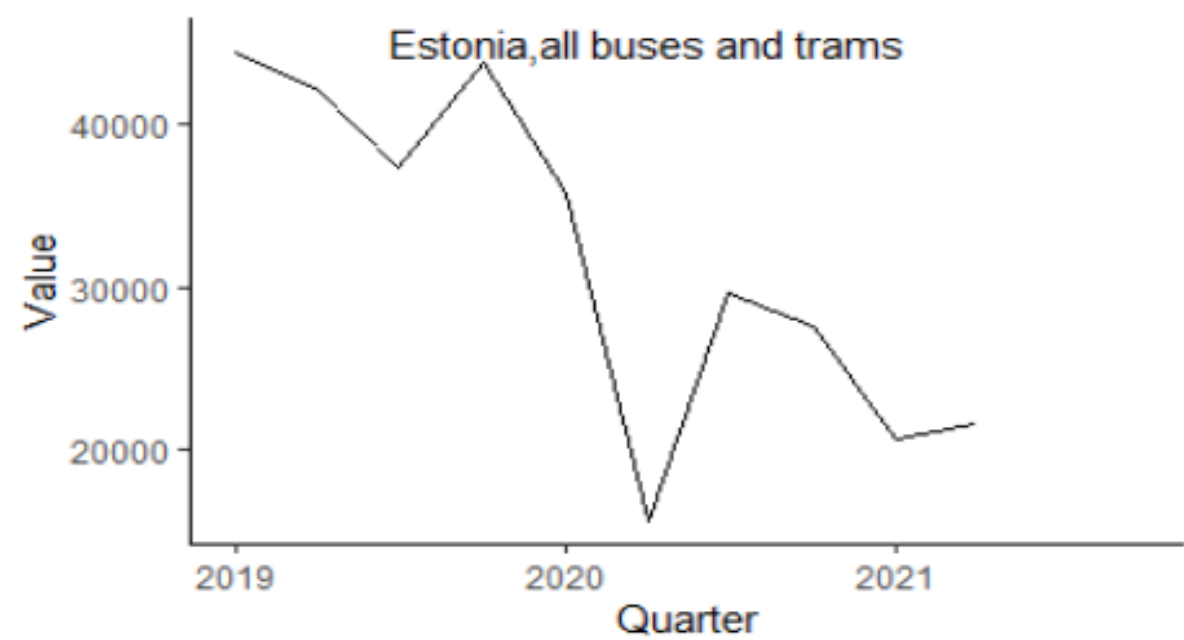

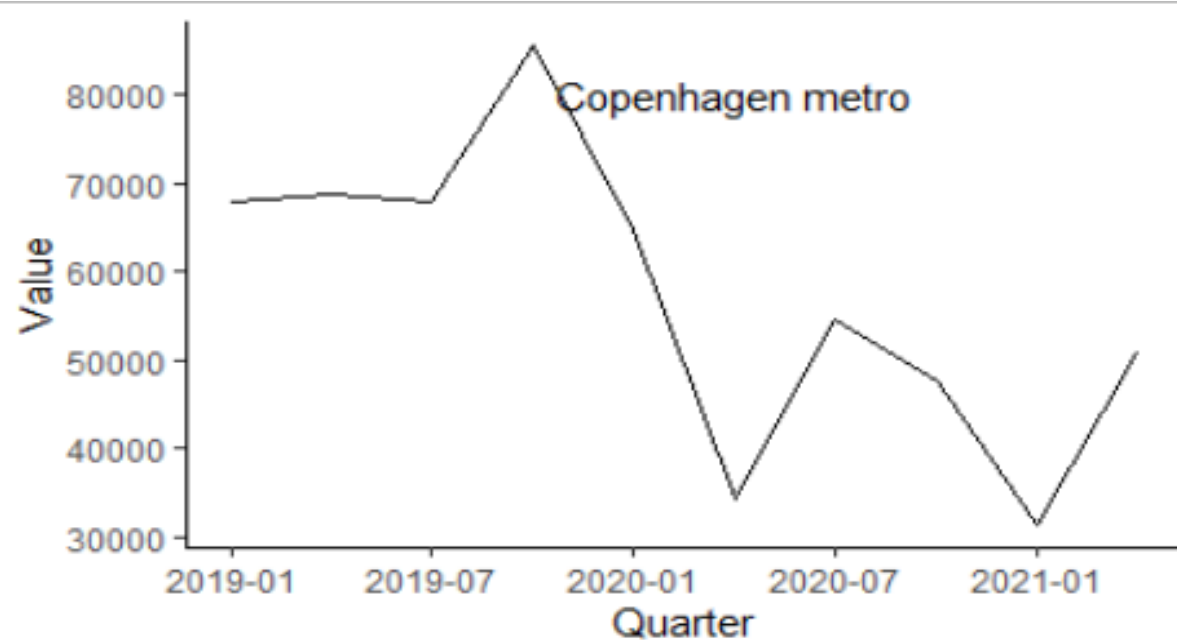

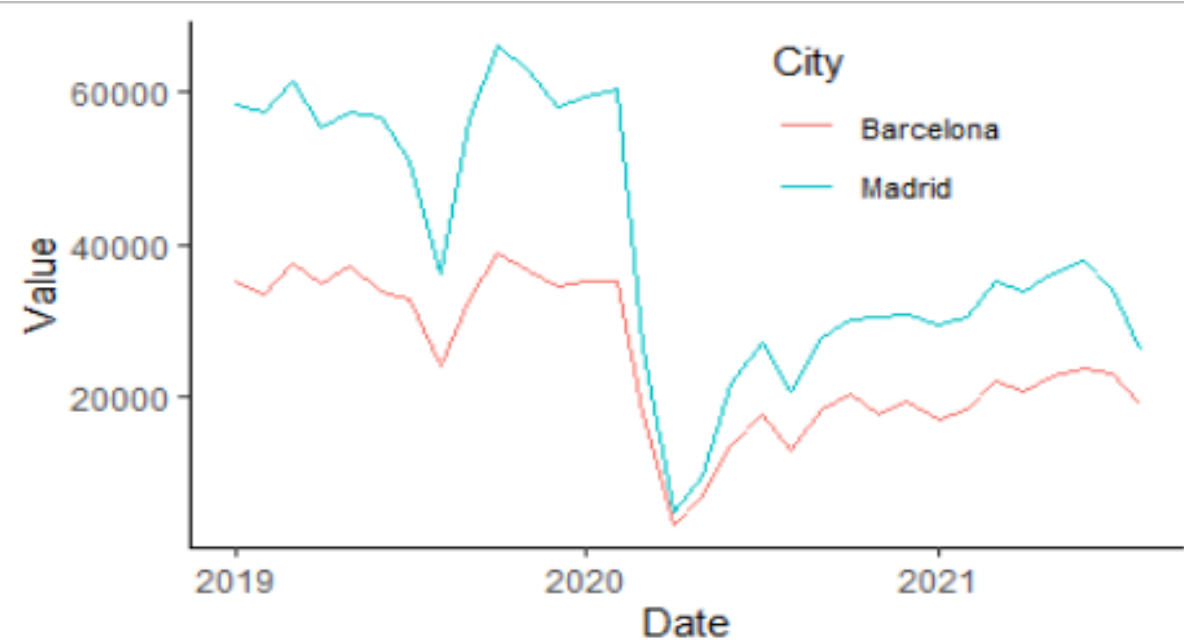

# Public Transport Data

- Tram and metro data collection: 145+ cities+27 countries.
- <https://unece.org/tram-and-metro-data> (CSV download)
- Can we automate the collection process?

## Mobility data to inform the COVID-19 crisis response at EU scale

UNECE and ITF virtual meeting series on Mobility Monitoring, 16 September 2020

*Michele Vespe – Stefano M. Iacus  
Joint Research Centre – Ispra (VA), Italy*

UNECE and ITF virtual meeting series on  
Mobility Monitoring  
“Exploring new transport data sources”

## German Truck Toll Mileage Index an experimental daily index early available and economically meaningful

The Federal Office for Goods Transport  
Lisa Döring\*, Michael Cox & Claus Goebels  
\*presenting and contact person  
Lisa.Doering@bag.bund.de

REPUBLIC OF SLOVENIA  
STATISTICAL OFFICE

SURS We count. Today for tomorrow.

# September 2020

Lessons learned from the collecting of **data on mobility with the mobile app**, from **automatic traffic sensors data** and from **data obtained from the MNOs** for tourism and / or transport statistics purposes

## Recent lessons and developments with Mobile Positioning Data

Marek Rannala, Positium  
ITF/UNECE meeting “Exploring new transport data sources”  
16.09.2020

# Toward a Real-Time Business Conditions Index

Alessandro Alasia  
Centre for Special Business Projects (CSBP)

Presented to the UNECE and ITF virtual meeting series on Mobility Monitoring:  
“Exploring new transport data sources”

## HOW TO UTILIZE MOBILITY DATA PROVIDED BY MOBILE NETWORK OPERATORS IN TRANSPORT AND URBAN PLANNING

January 26, 2021

**SMART MOBILITY**

REGIONAL DIRECTOR, MARKKU KIVARI

RAMBOLL

# January 2021

Ministerio de Transportes y Telecomunicaciones  
Gobierno de Chile

## Urban mobility patterns using big data

Viviana Muñoz - vmunoz@mtt.gob.cl  
Big Data in Transportation Area

Intelligent Transportation Systems  
Ministerio de Transportes y Telecomunicaciones de Chile  
January 2021

[wiki.unece.org/pages/viewpage.action?pagelid=109352183](https://wiki.unece.org/pages/viewpage.action?pagelid=109352183)

- Lots of interest: 45+76 participants.
- Main interest in Mobile Data, covering MNO data, App-based...
- Some countries started from scratch, others adapted existing projects.
- Importance of partnerships.
- Sustainability.
- PRIVACY!
- But traditional data are not dead.

# What next?

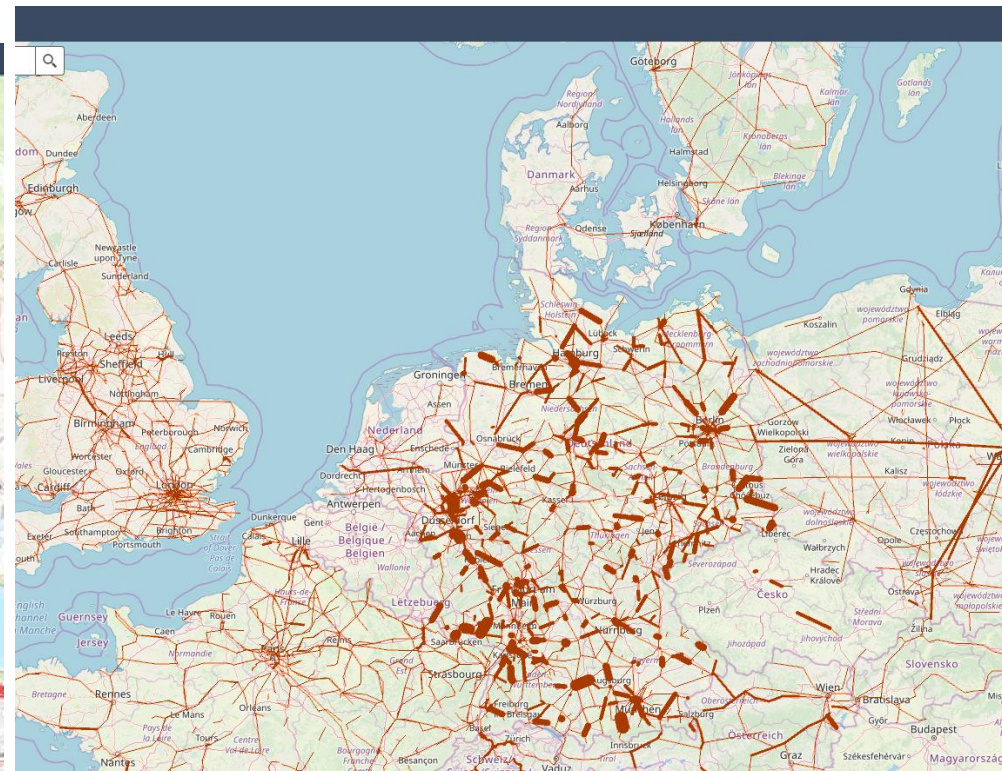

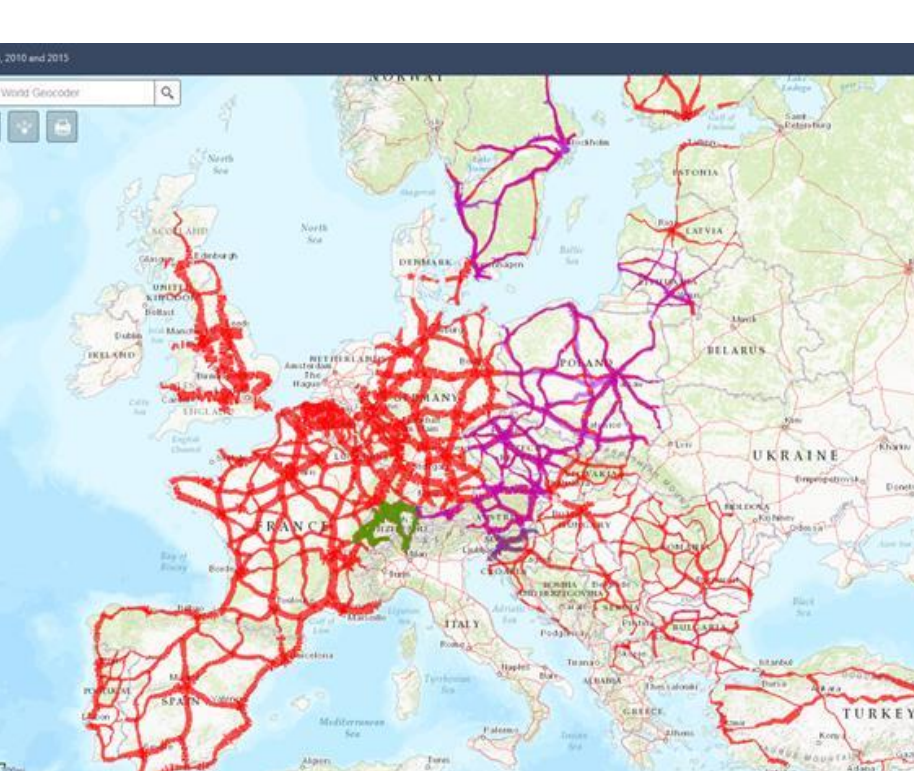

- Possible Big Data group? MNO data a focus? Expected output?
- Country practices or Recommendations?
  - Data sharing agreements, strategy for cooperation, benefits.
  - **Techniques** for data processing, collating datasets, privacy....
- Cross-Border Data Project?
- Monitoring transport for its own sake, or as input (business conditions, industrial production, covid spreading...)?

# Censuses

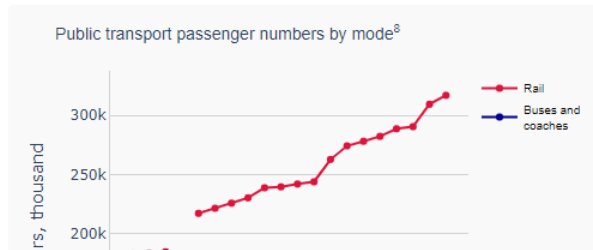

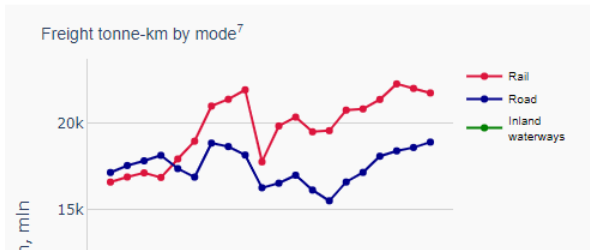

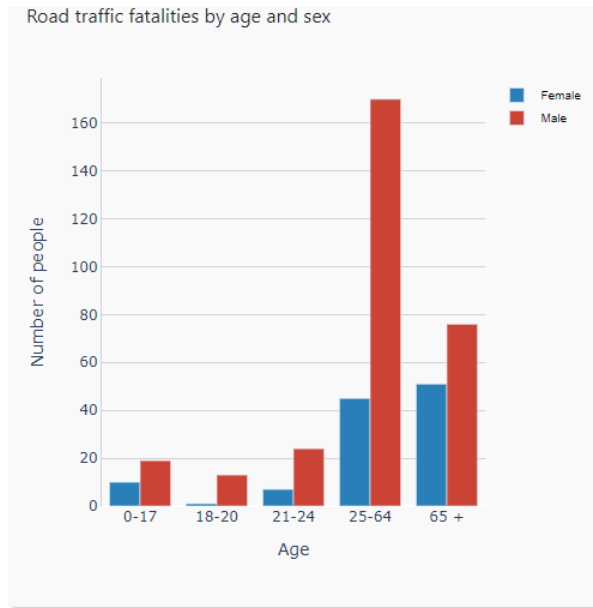

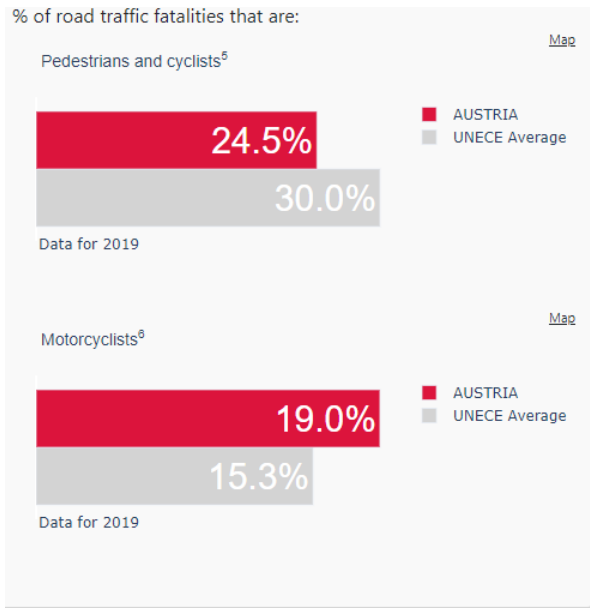

- Every 5 years, UNECE collects traffic information on the E-Road and E-Rail networks.
- Allows an assessment of network capacity.
- Adds a geospatial element to traffic statistics and corridor analysis/modal shift.
- Tracks Euro Asian goods flows.
- Climate change adaptation.
- We complement this with analysis of Goods+passenger flows (Eurostat NUTS2 o-d data).
- **Needed: traffic count data for more countries.**
