## **Policy Pathways for Decarbonising Transport**

Friday, 7 December 2018  
18:30 - 20:00  
Room Pieniny

---

### **Objective**

This event will highlight the International Transport Forum's (ITF) Decarbonising Transport initiative's outcomes and serve as a platform to foster an inclusive policy dialogue. Policy pathways that will reduce carbon emissions from urban transport, road freight, maritime, and aviation transport will be presented, including sustainable public transport and rail systems. The objective of this event is to introduce a range of effective short and long term policies and measures that will help countries and cities in both developing and developed regions reduce their transport carbon emissions and provide policy options to be included in national or local climate action plans.

### **Moderator**

Barry Howe, Director, Sustainable Mobility and Community Investment, Alstom

### **Speakers**

#### ***Opening Statements***
