From 1 April 2018, the Republic of Slovenia will apply an electronic tolling for vehicles whose maximum permissible laden weight (TPLW) is above 3.5 tonnes. Drivers of vehicles with the maximum permissible weight above 3.5 tonnes will need to equip their vehicle with the DarsGo unit before entering the highway network. Detailed information including the instructions for using the system is available on the DarsGo website (https://www.darsgo.si/portal/en/home)
