Quantitative characteristics of Greek reservation on the Basic quota

In 1996 [CEMT/CM(96)5], Greece decided to maintain its quota at the level of 1st January 1996, namely 149 traditional licences, while applying the reciprocity principle according to which the number of licences from the other Member countries valid on Greek territory were to be maintained at the same, 1996, levels.

This position implied that Greece would not recognize a multiplier (coefficient) applied for the use of a Green (X2) or a Greener and safe lorry(X4), introduced as from 1 January 1997, nor any increase in numbers of the basic licenses for individual Member countries.

This position has been maintained until 2010. In 2011, Greece referring to economic crisis in Europe reduced its own quota, as well as number of licences from the other Member countries valid on Greek territory, to 90. This unilateral decision reduced the total number of Member countries licenecs valid on Greece territory by more than 35%, from 5847 to 3780 units.

Status of the Greek reservation on Basic quota since 2002 (2002=1996) is reproduced in Annex1.

Annex 1: Quota valid in Greece regardless of the vehicle category
